Refrigerator Check: LG vs. Samsung Refrigerators (Full Guide)

Refrigerators have come a long way since their invention a century ago when they were considered a luxury item. Now, refrigerators have been an irreplaceable and important piece of almost every modern kitchen. Consumers have a wide range of fridge options for their household, including French doors, top or bottom freezers, and built-in refrigerators.

So we at DaDongNY understand just how hard it may be to find the "perfect one" for you. What you need is a refrigerator that fits your lifestyle and can be a dependable [30-inch cooling partner](#) over time.

And if you go to your local store to buy a refrigerator, you probably know the competition is between the LG and Samsung brands. These [garage refrigerator](#) manufacturer juggernauts have consistently improved their game to deliver everyone the finest of the best.

But at the end of the day, we only have to choose one, so without further ado, let's compare refrigerators: LG and Samsung to help you decide which one is ideal for your home.

Brand Overview

LG

It says a lot when it comes to [LG](#), a brand best known for its televisions and appliances that has risen to the top of the industry. LG has lately surpassed [Whirlpool](#) as the world's largest appliance manufacturer. LG refrigerators, without a doubt, played a significant role in the brand's development, exhibiting an innovative line of food preservation designed for easy organization, a stylish look in the kitchen, and extending the lifespan of food.

LG has a wide range of refrigerators available in three main lines. The LG refrigerator range is the entry-level selection, yet it still has many winning features that buyers prefer from LG. LG Studio and LG Signature refrigerators have exclusive enhancements and finish appropriate for rich customers with larger budgets.

LG's refrigerator lineup is as follows:

- *Top freezer*
- *Bottom freezer*
- *Side by side*
- *French door*

LG refrigerators are categorized as mid-end items and range in price from \$650 to \$8,000. If you want a custom integrated refrigerator, LG has a built-in refrigerator for roughly \$9,500 that is not panel-ready.

Samsung

When it comes to refrigerators, LG sets the bar extremely high, but [Samsung](#) refrigerators give the brand a competitive edge. Specifically, it's pricing. In comparison to LG, Samsung refrigerators are significantly less expensive, with full-size models ranging from \$850 to \$4,600, while Samsung offers a built-in refrigerator for roughly \$7,000, just like LG.

Nevertheless, Samsung is out of the picture if you want a bottom freezer refrigerator. Otherwise, the company competes with LG on every level, offering top freezers, side-by-side, French door freezers, and 4-door quad-style refrigerators for added diversity.

The [Bespoke series](#), Samsung's most personalized refrigerators to date, was unveiled. Bespoke refrigerators feature door panels that may be replaced with exclusive colors to produce unique color combinations. Of course, this is in addition to the Samsung Family Hub touchscreen fridges, a must-see if you want a linked kitchen in your smart home.

Features

LG and Samsung refrigerator brands both strive to provide the best refrigerator features for everyone. Every model they produce and sell to the market includes the most recent and innovative technology. All features are designed to satisfy consumers' wants and needs.

LG

Here are some of the best features to look for when purchasing the best LG refrigerators:

<i>Door-in-Door</i>	With a built-in door that opens to narrow storage within the front panel, you can get to your favorite foods faster, and not only that, save energy and time!
<i>Insta-View Door-in-Door</i>	This addition to the Door-in-Door function uses a glass panel that allows you to view through the front door with only two knocks.
<i>Door Cooling+</i>	With this special air jet system that keeps in-door food items fresh, you can extend the life of condiments, relishes, milk, juice, and eggs.
<i>Craft Ice</i>	Whiskey aficionados will love the LG Craft Ice maker, which creates ice spheres that melt slowly and look picture-perfect.
<i>Full-Convert Drawer</i>	Increase your storage capacity with this particular drawer, which has five settings ranging from fresh to frozen.

Samsung

Here are some of the best features to look for when purchasing the best Samsung refrigerators:

<i>Family Hub</i>	Connect the Samsung Family Hub refrigerator to the rest of your smart home's gadgets for a completely integrated experience that allows you to browse recipes, monitor food inventory, and even order groceries.
<i>Twin/Triple Cooling System</i>	These two independent compressors provide temperature control for the freezer and refrigerator cabins. Samsung 4-door Flex refrigerators come with an extra compressor for FlexZone compatibility.
<i>FlexZone</i>	With a flexible zone that shifts from fresh food to frozen settings, a four-compartment refrigerator structure with three evaporators facilitates food storage.
<i>Food Showcase</i>	Load up on your favorite snacks and beverages without having to open the entire refrigerator with this discreet door panel within the fried door.
<i>Metal Cooling</i>	A metal panel that keeps the produce section cold and locks in freshness is available on some Samsung refrigerators.

Breakdown: LG vs. Samsung Refrigerators

LG

[LG Smart InstaView Counter-Depth Max](#)

LG's Energy Star-certified Smart InstaView® Counter-Depth Max French Door Refrigerator provides a massive 26 cubic feet storage room for fresh food. Furthermore, LG claims to have the industry's greatest counter depth capacity, optimizing storage space with a wider width and shallower depth. With LG's InstaView® Edge-to-Edge technology, you only have to knock twice on the door to get an instant glimpse of what's inside, keeping things cool and energy costs low. A large pull-out freezer at the bottom of the refrigerator has two deep drawers for frozen items.

The following are the LG Smart InstaView Counter-Depth Max specifications:

<i>Model Number</i>	LRFOC2606S
<i>Color</i>	Stainless steel

<i>Color Finish</i>	Stainless steel
<i>Product Height</i>	68 22/25 inches
<i>Product Weight</i>	35 ¾ inches
<i>Product Depth</i>	31 ⅝ inches
<i>Refrigerator Capacity</i>	16.8 cubic feet
<i>Freezer Capacity</i>	8.7 cubic feet
<i>Configuration</i>	Freestanding
<i>Style</i>	French Door
<i>Lighting Type</i>	LED
<i>Defrost Type</i>	Automatic
<i>Ice Maker</i>	Yes
<i>Freezer Compartment</i>	Yes
<i>Water Filtration</i>	Yes
<i>Fingerprint Resistant</i>	Yes
<i>Sabbath Mode</i>	Yes
<i>Wireless Connectivity</i>	Yes (Wi-Fi)
<i>App Compatible</i>	Yes (Amazon Alexa and Google Assistant)
<i>Air Filter</i>	Yes
<i>ENERGY STAR® Certified</i>	Yes
<i>ADA Compliant</i>	No
<i>CEE Qualified</i>	No
<i>Manufacturer's Warranty (Parts)</i>	1 Year General 5 Years Sealed System 5 years Compressor 10 Years Linear Compressor
<i>Manufacturer's Warranty (Labor)</i>	1 Year General 5 Years Sealed System 5 years Compressor 10 Years Linear Compressor

Pros and Cons

<i>Pros</i>	✓ Has a lot of storage space ✓ It has an Insta-View Door-in-Door technology that allows you to enter by knocking on the door ✓ There is an ice and water dispenser
<i>Cons</i>	✗ It's a little expensive ✗ Enough kitchen space is required

Samsung

[Samsung Smart 4-Door Flex](#)

This Samsung fridge has a 29 cubic feet of storage space, giving households more than enough space to store fresh produce. With an internal water dispenser and a built-in autofill water pitcher, its beverage center gives filtered, cooled water in two ways, while the dual ice maker provides cubed and chipped ice anytime you need it. This appliance also has a FlexZone™, which is a multipurpose lower-right storage section that switches from fridge to freezer temperatures. It has five temperature settings that can be customized, giving it a lot of versatility. Ideal for excess, holidays, and entertaining.

The following are the Samsung Smart 4-Door Flex specifications:

<i>Model Number</i>	RF29A9671SR/AA
<i>Color</i>	Stainless steel
<i>Color Finish</i>	Stainless steel
<i>Product Height</i>	71 7/8 inches
<i>Product Weight</i>	35 7/8 inches
<i>Product Depth</i>	33 7/8 inches

<i>Refrigerator Capacity</i>	17.4 cubic feet
<i>Freezer Capacity</i>	11.6 cubic feet
<i>Configuration</i>	Freestanding
<i>Style</i>	French Door
<i>Lighting Type</i>	LED
<i>Defrost Type</i>	Frost Free
<i>Ice Maker</i>	Yes
<i>Freezer Compartment</i>	Yes
<i>Water Filtration</i>	Yes
<i>Fingerprint Resistant</i>	Yes
<i>Sabbath Mode</i>	Yes
<i>Wireless Connectivity</i>	Yes (Wi-Fi)
<i>App Compatible</i>	Yes (Amazon Alexa, Bixby, Google Assistant, Smart ThinQ)
<i>Air Filter</i>	Not Specified
<i>ENERGY STAR® Certified</i>	Yes
<i>ADA Compliant</i>	Yes
<i>CEE Qualified</i>	Not Specified
<i>Manufacturer's Warranty (Parts)</i>	1 Year
<i>Manufacturer's Warranty (Labor)</i>	1 Year

Pros and Cons

<i>Pros</i>	✅ There is a lot of storage space ✅ There is an ice and water dispenser available ✅ It is available in a range of colors
-------------	--

Cons	✗ Extra clearance may be required for doors ✗ There is no deli tray included
------	---

Side-By-Side Comparison: LG vs. Samsung Refrigerators

1. Price

The price range for both brands is huge. Yet, if you're searching for a low-cost refrigerator, Samsung has the upper hand. The [Samsung RS25J500DSR](#) side-by-side refrigerator is our top recommendation for a low-cost side-by-side refrigerator, but there are lots of other high-quality Samsung refrigerators available for less than \$1,000.

LG, on the other hand, offers a slightly restricted range. A full-size refrigerator starts at roughly \$1,500. At the higher end of the scale, both brands reach up to \$7,000, with numerous models priced between \$3,000 and \$4,000.

2. Product Range

LG appears to like the French door on their refrigerator models. It has plenty of side-by-side variants, but the majority of its brightest and best are French door designs. On the other hand, Samsung completely dominates our side-by-side guide, featuring three times in a list of only 12 items.

While side-by-side and french door refrigerators predominate, Samsung and LG offer top and bottom freezer freezers. They are best suited to modest houses as an alternative to purchasing a little fridge and a freezer.

3. Design

To start with, both LG and Samsung feature glossy and high-level designs that create a statement. You'll have no trouble finding a large-capacity refrigerator from these companies, and it's not uncommon to find models in both counter-depth and full-size configurations. This implies that if

you acquire the perfect refrigerator, but it isn't the right size for your kitchen, you might be able to get the same appliance in the right depth.

Another distinguishing feature is color. LG refrigerators are commonly available in stainless steel or black stainless steel. These hues are available from Samsung, but it also provides a distinctive Tuscan stainless steel with a comfy plum gloss.

4. Features

Everything you'd expect from a refrigerator is available from Samsung and LG. The majority of ice producers include crushed and cubed ice, as well as filtered water dispensers. The LG LSXS26366S side-by-side refrigerator features Slim SpacePlus technology, ensuring the ice maker functions properly without taking up too much freezer space.

Both companies also offer crisper drawers with humidity control. They control the humidity in your refrigerator, allowing fresh fruits and vegetables to stay crisp for longer periods.

Smart features are becoming increasingly common in refrigerators, and Samsung and LG have taken the lead in this area. The '*Family Hub*' is a feature found in Samsung refrigerators. This is **Wi-Fi** and **Bixby** compatible, so you can pair it with a smartphone and use an app to monitor your refrigerator. This can help to replenish your fridge and freezer before you load them with new foods.

Some even have **built-in cameras!** The Family Hub allows you to **write notes electronically**, **stream music or films**, and **keep track of your grocery list** for easier shopping. Even basic tasks like putting a family photo on your fridge may be done remotely, making it truly the heart of your house.

LG's counterpart, on the other hand, is less wholesome and more contemporary. The door-in-door design allows you to knock on your refrigerator door to reveal a window into the interior. This means you won't lose any cold air from your fridge while looking to see whether you need more milk or if you have any wine in there.

The display prominently displays the inside temperature of your refrigerator, allowing you to ensure that your food is being kept at the proper temperature.

When it comes to door-in-door refrigerators, both LG and Samsung include a smaller door on the front of the fridge that keeps all of your basics without having to open the entire fridge. This is great for getting butter, milk, or a cold Coke from the fridge without losing track of where you're going. It also makes refrigerator organization easier than ever before.

5. Energy Efficiency

One way to guarantee that your fridge is energy efficient is to look for the Energy Star label. LG and Samsung provide more energy-saving options than other refrigerator manufacturers. This incorporates door-in-door features as well as LED lights that do not interfere with your refrigerator's chilling process.

Some of our top refrigerator choices from LG, such as the [LG LSXS26366S](#), do not have Energy Star certification, whereas the majority of Samsung refrigerators have. If energy efficiency is important to you, it's worth looking at individual models before purchasing but Samsung comes out on top when offering energy-efficient designs.

Which Refrigerator Should You Purchase?

Between LG and Samsung, we recommend investing in an LG refrigerator if you want a sophisticated refrigerator with a modern feel. Its knock-off looks are slightly more refined than the family-friendly Samsung Family Hub.

When it comes to affordability, Samsung comes out on top. While both Samsung and LG sell refrigerators for over \$5,000, Samsung's prices begin to lower.

Both manufacturers are constantly developing and producing amazing new appliances, so whether you buy a Samsung or an LG, you can be confident that while some fun features are available, there is no sacrificing quality design.

FAQs

- Which Brand Of Refrigerator Is Better: Lg Or Samsung?

Both the LG and Samsung brands have excelled because of their unique selling points. They have supplied remarkably similar looks and features on their appliances, particularly refrigerators.

Yet, LG leads in terms of invention, while Samsung leads in terms of style. Aside from that, they use different technologies: LG uses a linear compressor, whereas Samsung uses a digital inverter.

- Are Lg Refrigerators Better Than Samsung Refrigerators?

Both the LG and Samsung brands offer distinct features and designs. Nonetheless, their functionality, design, and door configuration are nearly identical.

One of the main differences between these brands is the above-mentioned technology: LG employs a linear compressor, while Samsung employs a digital inverter. LG's linear compressor is superior because it works smarter and lasts longer, and their refrigerator produces spherical ice that lasts longer than Samsung's.

- What Are The Advantages Of Lg Versus Samsung?

Known as the "Kingmaker of Kitchen," the [LG brand](#) provides cutting-edge products that meet users' needs. LG refrigerators feature linear compressors, a technique that keeps your food fresh for an extended period of time. Their refrigerators produce spherical ice that lasts longer than Samsung's.

LG refrigerator models also have smart diagnostics, LoDecibel™ operations, and an instant-view door design that lets you see what's inside your refrigerator. It also boasts an auto door opener and remote fridge management via [Smart ThinQ™ technology](#).

- What Are The Advantages Of Samsung Versus Lg?

Samsung features an excellent handle-less design in almost all of its refrigerators, making them more roomy and minimalistic than LG. Samsung uses a digital inverter and a twin cooling technology that operates freezers and refrigerators separately with separate evaporators.

Furthermore, Samsung refrigerators feature [FlexZone™ technology](#) that converts from freezer to refrigerator and vice versa. It also offers a touchscreen door, voice control, and notifications.

Bottomline

In the battle between the LG and Samsung brands, we learned everything we should know about these two powerhouse appliance manufacturers.

LG and Samsung were not as prominent in the marketplace ten years ago, but they now stand as the best innovative home appliance brands. The distinct qualities of these two brands can make it difficult to select which one to choose for their household, as LG and Samsung are both

dependable and provide several extra features to improve the consumer experience. This user guide is necessary for consumers to effectively know the products.

We hope that by providing these comprehensive analyses, we can assist customers in recognizing distinguishing features. Both businesses currently dominate the market in terms of features, innovation, design, and quality. Based on your needs, choose the best Samsung refrigerator from this comparison. Choose the [best under-counter refrigerator](#) that appeals to you and meets all your requirements.
