Meta Description: Try 23 simple and tasty air fryer recipes for breakfast, proteins, vegetables, desserts, and snacks after buying a new air fryer.

23 Simple And Tasty Recipes To Try After You Get An Air Fryer in 2023

In place of the traditional [unhealthy deep frying](#) method, an air fryer is an easy and healthy way to prepare meals. To understand how this equipment works, the air fryer cooks your food by circulating 400 °F of hot air through it while using little to no oil. With the convenience that an air fryer can provide, this kitchen appliance has been a staple to almost every household. According to [The New York Times](#), **around 36% of American households** own one of these air fryers because of its convenience, and the number is expanding yearly.

However, an air fryer, like any new appliance, can be daunting to use, especially if you've only recently purchased one. Chances are, you're still learning the ropes on your brand-new equipment. But don't worry, we at [DaDongNY](#) have 23 mouthwatering air fryer recipes you can try in 2023.

So, Why Air Fryers Anyway?

- ***It cooks food efficiently.*** The air fryer takes only 2-3 minutes to warm, less than most ovens' [15-minute preheat period](#). Furthermore, you can just toss everything into an air fryer and walk away because this kitchen appliance evenly cooks your food to a golden brown color!
- ***It does indeed crisp up your food to perfection.*** Not only does chopping meat into little pieces help it cook faster, but it also exposes the surface area and crisps it to perfection. After all, the crisper it is, the better, am I right?
- ***It does not generate heat in your kitchen.*** While the [best air fryer](#) may heat up the space surrounding it, it will never heat up the kitchen as an oven does. Trust me; you can get an air-fried [frozen pizza](#) and eat it in the middle of summer.
- ***It fuses baking and grilling into one.*** Sometimes you have to bake food to have the insides perfectly cooked before grilling it to get the exterior crisp you want. An air fryer can handle both of these tasks simultaneously, avoiding the need for multiple appliances. That is pure brilliance right there!
- ***It can make baked goods taste better than just baking.*** If your food already has natural fat, it will cook perfectly in an air fryer.
